DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 10-14, drawn to a method and apparatus for transmitting data, classified in class 375, subclass 295.
 - II. Claims 6-9 and 15-21, drawn to a method and apparatus for receiving data, classified in class 375, subclass 316.
2. The inventions are distinct, each from the other because of the following reasons:
Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification and because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
3. A telephone call was made to applicants' representative, Mr. Michael Musella (Reg. No. 39310) on 8/22/07 (See Interview Summary attached) to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include:

- (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and
- (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
